LOWE

2007 Tinja Botrytis

Vineyard - Mudgee – 450 metres

Vintage - the record drought of 2007- hardly any produced

Vinification

Made from Semillon grown in a creek-side hollow that is prone to trapping early morning dew. The natural botrytis infection is encouraged by spraying the vines with water and lowering the canopy to block cross ventilation. Crushed and left to soak for 36 hours to extract as much sugar as possible the juice is finally fermented in stainless steel

Tasting notes

.Apricots, peach stone, honey and lemon with the intense sweetness balanced by bittersweet mandarin peel characters Good with blue cheeses , tart tatin or just while lying horizontal on the sofa perhaps.
